PREET MEHTA

Linguist · Product & App Testing · Media Localisation

Mumbai, Maharashtra, India | preet.mehta0701@gmail.com | https://www.linkedin.com/in/p-m-769217249/ | preetm07.github.io

PROFILE

Freelance linguist since 2014 who also thinks like an engineer. I localise, test and deliver content and products in English, Hindi, Marathi and Gujarati across clinical, healthcare, technical, marketing, games, tourism and finance. Four years of C++ and firmware work at Gilbarco, plus a CDAC diploma, mean I read a build, a bug report or a string file the way a developer does, and then check the language the way a native speaker does.

WHAT I DO

01
Language Services
Translation to validation

- Translation, transcription and localisation, with trained review and proofreading
- Linguistic validation of translated content, including clinical and health-related material
- DTP: layout and formatting of translated files in Devanagari, Gujarati and Latin scripts
- Electronic implementation: placing and verifying translated content in digital platforms and files
- Domains: clinical, healthcare, technical, marketing, games, tourism, finance

Languages: English, Hindi, Marathi, Gujarati

02
Product & App Testing
Quality assurance with a linguist's eye

- Functional testing: test-case execution, defect logging with clear steps, evidence and severity, and regression checks
- Product and regional app testing: behaviour of apps and products across regions, locales, date, number and currency formats
- Multilingual testing: truncation, encoding, font and script rendering, placeholders and in-context linguistic review
- Hardware, OS and accessibility awareness: Android, iOS, Windows, macOS and Linux, different device sizes and resources, and accessibility settings
- Works inside Agile and Scrum teams with PSP discipline; issue tracking and reporting in Jira

Terms: functional testing, product testing, regional testing, multilingual testing, QA, Agile, Scrum, PSP, Jira

03
Media Localisation
From script to screen

- Subtitling and captioning to client and platform specifications
- Timed template creation conforming to studio guidelines, with speed and accuracy
- Dubbing direction: script adaptation, voice-talent guidance and sync review
- Learning and development: multilingual training content for corporates and products

SELECTED CLIENTS

Atlas Translation · ICON plc · Conversis · Mendoza · Acclaro · OpenAI

EXPERIENCE

Freelance Linguist & Localisation Specialist 2008 – Present
Independent, Mumbai · Remote for language service providers and direct clients

- Deliver translation, transcription, localisation, linguistic validation, DTP and electronic implementation in English, Hindi, Marathi and Gujarati
- Deliver subtitling, captioning, timed templates and dubbing direction for media and entertainment work
- Run functional, regional and multilingual testing of apps and products, reporting defects through Jira and standard test workflows

- Handled approx 6.7 Mn words till date across domains, furnishing translation memories and termbases, validating the output and impacting the markets.

Software Engineer, Embedded / Firmware (C++) 2015 – 2019

Gilbarco · Mumbai, India

- Developed and maintained C++ firmware for global fuel dispensers; around four years in a structured Agile engineering team
- Worked through requirements, debugging, testing and release cycles that now shape how I approach QA

EDUCATION & TRAINING

Diploma in Embedded Systems & Design, CDAC 2015

Bachelor of electronics and Telecommunications, Gujarat Technological University 2012

TOOLS & SKILLS

- Engineering: C++, JavaScript, HTML, CSS, Jekyll and GitHub Pages
- Process and tracking: Agile, Scrum, PSP, Jira
- Language tools: CAT tools - Trados, memoQ, Phrase; subtitle tools - EZTitles, Subtitle Edit; DTP tools - InDesign
- Languages: English, Hindi, Marathi, Gujarati
